

Page Plus

Wedding Invitation Design Software

You can download your up to date version of Page Plus Invitation Software by pasting the link below into your url/ www bar at the top of your browser.

We recommend installing Page Plus software first and then downloading the wedding template pack independently.

There is also an excellent graphics/ photo editing package which you can download free of charge as well from the same page.

<http://www.freerifsoftware.com/DesignTemplates/DesignView.asp?ID=1250&navProduct=pageplus>

We use the Page Plus range of software ourselves and have found it to be excellent.

Kind Regards

Tony
